DETAILED ACTION

In the reply filed on October 20, 2008, claim 12 has been amended. Claims 1 and 12 are further amended in the examiner's amendment indicated below. Claims 1-8, 12-16, 19, 20, 31-33 are pending.

Allowable Subject Matter

Claims 1-8, 12-16, 19, 20, 31-33 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art on record does not teach, disclose or fairly suggest the claim limitations, including, 'sending the assigned network address to the wireless client prior to establishing a secure link' and 'wherein the lease period is based upon the time expected for setting up the secure link'. Claims 2-8 and 31-33 depend from claim 1 and are allowed with the same rationale thereto.

With respect to claim 12, the prior art on record does not teach, disclose or fairly suggest the claim limitations, including, 'attaching at the network access point information to the request to indicate that the request originated from a wireless client' and 'wherein the lease period is based upon the time expected for setting up the secure link'. Claims 13-16, 19 and 20 depend from claim 12 and are allowed with the same rationale thereto.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with MacLane Key, Reg. No. 48,250 on January 16, 2009.

The application has been amended as follows:

In the claims:

1. (Currently Amended) A method for controlling access to a network by a wireless client, the method comprising:

assigning a network address to the wireless client, wherein the network address has a lease period;

sending the assigned network address to the wireless client prior to establishing a secure link;

establishing the secure link using the assigned network address; ~~and~~

sending an address of a wireless access point to the wireless client, wherein the wireless access point is adapted to handle the secure link established by the wireless client; and wherein the lease period is based upon a time expected for setting up the secure link.

12. (Currently Amended) A method for controlling access to a network by a wireless client, the method comprising:

receiving a request for a network address from the wireless client at a network access point;

attaching at the network access point information to the request to indicate that the request originated from a wireless client;

relaying the request to the address server;

receiving an assignment of an address from the address server, the address having a lease time;

relaying the assignment of the address to the wireless client;

negotiating the establishment of a secure link with the wireless client using the assigned address; ~~and~~

using the assigned address to communicate with clients via a wireless access point; and wherein the lease time is based upon a time expected for setting up the secure link.
